

# Course: MAT's Omega Theory<sup>©</sup>

## MAT's Omega Theory<sup>©</sup> Course

This 50 hour course (consisting in 10 Stages of 5 hours each Stage) offers comprehensive training in **MAT's Omega Theory**, so participants can fully understand and learn to use it in all its fields of application.

Two first Stages (10 hours in total) are aimed at acquiring basic tools and knowledge of the most advanced and innovative science in the World, **MAT** (the **Metamodel of Analysis that Transforms**).

*These first two Stages are transforming in their own right. Signing up to them requires no subsequent engagement.*

The eight following Stages (40 hours) are for those wishing to deepen their knowledge on **MAT's Omega Theory**, acquire more powerful tools and perfect their use of them, managing to apply them correctly in their personal and professional life and discovering the power of the **Omega Theory** applied to human organisations (couples, families, companies, institutions, countries), as well as to understand the different ages of humankind.

# MAT's Omega Theory Foundations

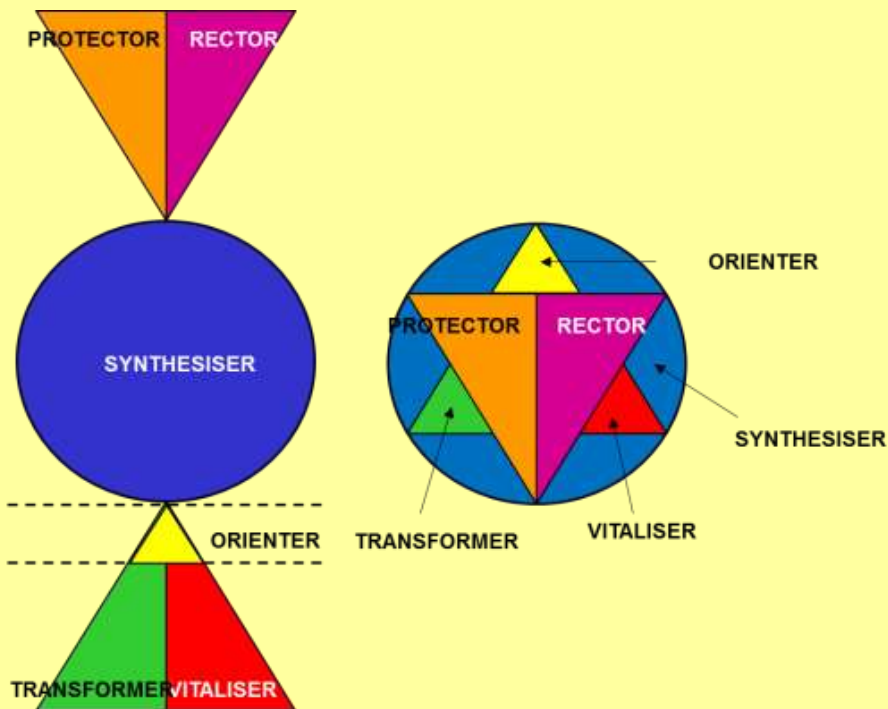

MAT's Omega Theory sheds new light on **human motivations**, and is a **new discovery about human nature**, made by Dr. [Preciada Azancot](#), creator of [MAT \(the Metamodel of Analysis that Transforms\)](#). MAT reveals:

- 1.- That human beings have a structure of **SEVEN highly specialized dimensions** (and not four, as believed since the ancient Greeks) which allow us to release all our potential and to make our way in the world in all human facets of life.
- 2.- That each of the first six dimensions is also associated to a single specialized energy, which is one of the **six innate authentic emotions**.
- 3.- That each one of the six active dimensions is **associated to a corresponding sense**, which MAT reveals to be six, with sex being the sixth sense, associated to the function of plenitude and the emotion of joy.

# MAT's Omega Theory Foundations

4.- That the seventh dimension is the Centre which must be empty in order to guarantee Evolution. Managing to keep the Centre empty depends on the good functioning of the other six dimensions and is a pursuit that we ought to engage in all our lives, since evolution towards the conquest of more sophisticated dimensions and energies can only start from here. The major enemies of this task are our egos, ideologies, magical beliefs, myths, determinisms and archetypes.

**In short, MAT discovers the innate and universal emotional and sensory engineering of the human being.**

# MAT's Omega Theory Foundations

Before detailing Course Contents we would like to mention that:

- **MAT's Omega Theory** is one of several **Megastructures** discovered by MAT's creator.
- **Megastructures are innate in all human beings and of fetal origin**, as are MAT's personality structure of seven dimensions and its emotional and sensory engineering.
- **Each Megastructure is more powerful than the preceding ones** (in this case, the Omega Theory is more powerful than the personality structure of seven basic dimensions of MAT).
- We present this discovery as a simple illustration of the importance of MAT's discoveries.

To read the **complete description of the MAT's Omega Theory**, please [follow this link](#).

# COURSE CONTENTS

50 hour consisting in 10  
Stages of 5 hours each one

*Taught directly by Doctor*  
**Preciada Azancot**, *MAT's*  
*creator*

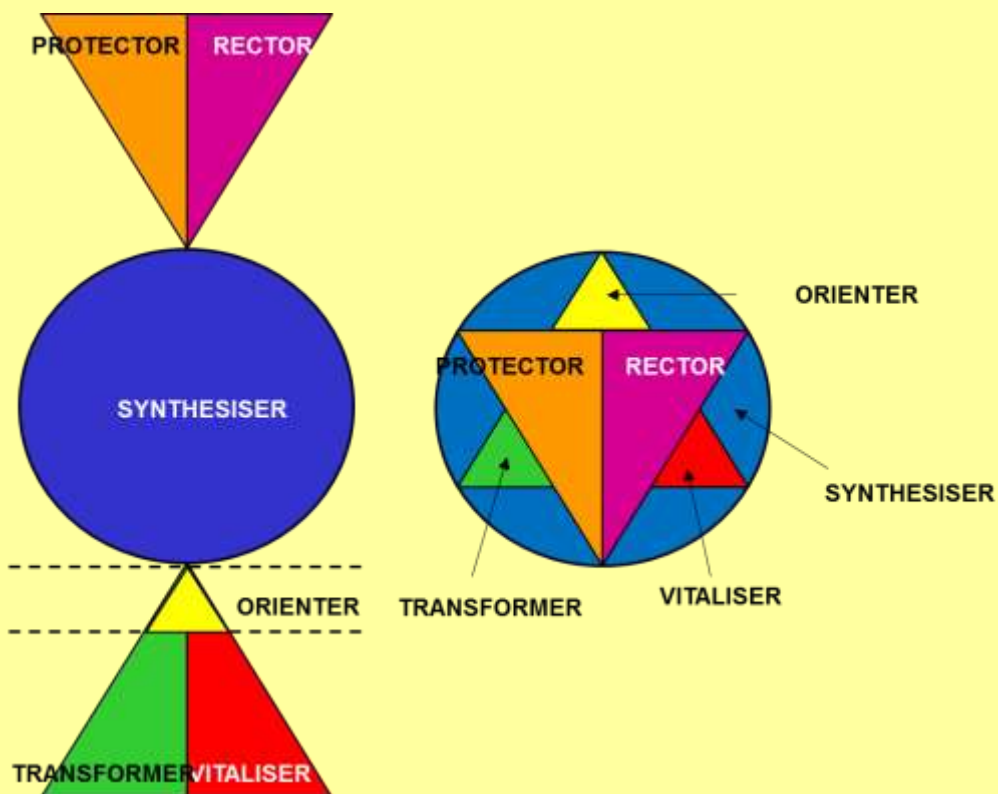

## Stage 1:

a- Discover The Splendour of the Human Being through the scientific revelation of the **7 innate** universes of the human being.

b- Discover and experience the **engineering** of the universal Human structure.

c- And how it affects each individual's **integral** physical, mental and moral **health**.

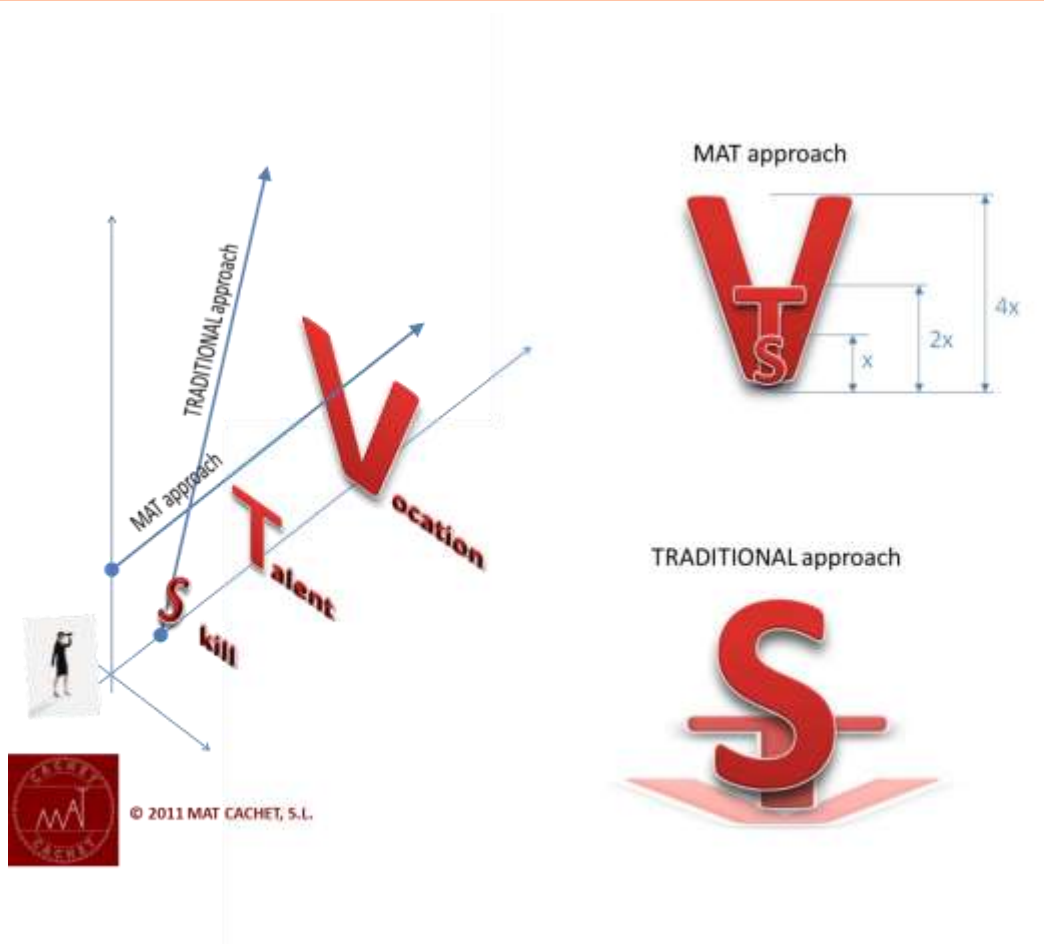

d- Learn about and assimilate the difference between the **concepts skill, talent and vocation** (mobilise **25%, 50%, 100%** of **transformational power**).

## Stage 2:

- a- Experience your own personal Splendour and learn to appreciate others’.
- b- Resolve the mysteries of our individual personality, by unmortgaging our individual skill, talent, vocation and two major pillars of our personality.
- c- Manage to accomplish our full potential in integral operation.

## Stage 3:

**Understanding, applying and managing the first innate human motivation: SAFETY**

We don't just need to cover our basic survival needs: a roof over our heads, food, clothing, health, etc., we also need safety in relation to ourselves and to our social surroundings: **to know that our right to live and to be different is not questioned.** In-depth knowledge of ourselves and of others' differential features will give us access to the highest possible level of safety, because at the same time as boosting our level of confidence, it will allow us to select the best and to defend ourselves from harmful people.

**Understanding, applying and managing the abilities restored by Safety, in its proper order:**

1.- Establishing limits, 2.- Making diagnoses, 3.- Separating, 4.- Localising, 5.- Defending, 6.- Legislating.

**Health recovered in the:**

Immune system, Kidneys and adrenal glands, Skin,  
Mucous membranes, Neck.  
Sense: Touch.

## Stage 4 :

### Understanding, applying and managing the second innate human motivation: **DEVELOPMENT**

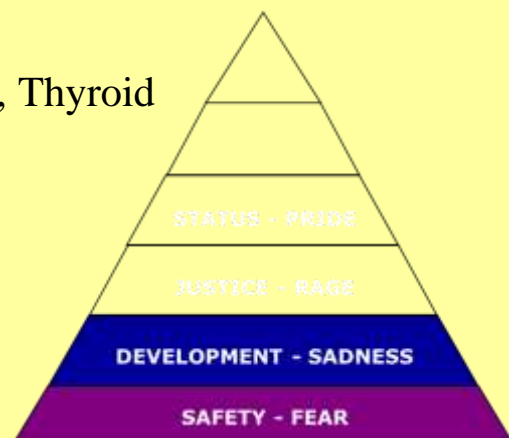

Once we are in possession of the logistical, material and human resources required for our activity, we need to be **fully aware of our own and other's creative potentials and to learn to motivate them**. Human beings therefore need to locate their vocational zones of excellence and to discover others'. This knowledge must become effective through a system of communication which locates, motivates, extracts and protects creative capacity on a personal and group level.

### Understanding, applying and managing the abilities restored by Development:

1.- Selecting, classifying, archiving, updating and connecting, 2.- Perceiving what is dead, perceiving losses and gains, 3.- Finding options, finding solutions, developing, 4.- Negotiating and communicating, 5.- Relating, calculating and processing, 6.- Thinking, memorising, searching.

### Health recovered in the:

Brain, Lymphatic and Circulation system, Thyroid glands, Hearing, as the organ and sense.

## Stage 5:

**Understanding, applying and managing the third innate human motivation: JUSTICE**

In addition to the universal need for answers that acknowledge our right to freedom, equal opportunities and equal treatment, **we need to see these as a reality and to channel them in our daily lives.** For justice to be complete, it must pass from being an individual theoretical right to becoming a collective affair, and we call this: culture. This reinforces leadership based on the real talent and vocation of every member.

**Understanding, applying and managing the abilities restored by Justice:**

1.- Perceiving, distributing, assigning, 2.- Reacting, vitalising, curing, 3.- Feeling, 4.- Mobilising, 5.- Denouncing, attacking, eradicating, 6.- Diluting, dissolving.

**Health recovered in the:**

Liver and gallbladder, complete Digestive system,  
Sense: Smell.

## Stage 6:

### Understanding, applying and managing the fourth innate human motivation: **STATUS**

Aside from our natural right to collective and individual recognition for our exceptional merits, we all have a fundamental aspiration: not only not to be penalised with envy if we stand out above mediocrity, but also to be rewarded for it, through **achieving the admiration of those around us, as well as receiving the intrinsic rewards of a symbolic and material nature** that reflect the real status we deserve.

### Understanding, applying and managing the abilities restored by Status:

1.- Consecrating, accessing, affirming, 2.- Transforming, creating, allowing growth, 3.- Imagining, acknowledging what is valid, 4.- Testing, searching for what does not exist, 5.- Evolving, discovering, 6. Choosing, deciding, representing, declaring, determining.

### Health recovered in the:

Parathyroid glands, Bone system, Vocal chords and voice, Body weight, Sense: Taste.

## Stage 7:

**Understanding, applying and managing the fifth innate human motivation: BELONGING**

We need to feel fully accepted, but also *committed, irreplaceable and at the same time dispensable*. The point of this fifth phase is to *arouse, deserve and preserve authentic love*, of the kind that is born from our most secret, most profound, most universal and intimate signs of identity, which we all share as human beings. This helps to build a safe space, where each of us can recover and preserve faculties we believed were lost, a space where we can live in plenitude and choose to commit ourselves.

**Understanding, applying and managing the abilities restored by Belonging:**

- 1.- Giving, fulfilling, committing oneself,
- 2.- Uniting,
- 3.- Evaluating,
- 4.- Encouraging, motivating,
- 5.- Helping, protecting,
- 6.- Establishing common ground, accepting.

**Health recovered in the:**

Pituitary gland, Lungs, Heart, Eyes,  
Sense: Sight.

## Stage 8:

**Understanding, applying and managing the sixth innate human motivation: **PLENITUDE****

It is a question here of liberation, instituting, as the human being's right and most sacred duty, the pursuit of happiness through the conquest of our complete human stature, in a continual process of inner growth. The human being access *a true liberation and the joy of certainty as we relieve ourselves of dead weights, and as we discover the true finality of creation: that of realising our vocation for joy, in peace.*

**Understanding, applying and managing the abilities restored by Plenitude:**

- 1.- Illuminating, irradiating, elevating, 2.- Comprehensive experiencing, renewal and self-renewal, 3.- Flowing, enjoying, 4.- Finding truth, discerning, 5.- Planning, opening up new paths, change and self-change, 6.- Revealing, bearing witness.

**Health recovered in the:**

Reproductive system and sex glands, Pancreas, Psyche,  
Sense of orientation, Sense: Sex.

## Stage 9:

**MAT's Omega Theory applied to human organisations (couples, families, companies, countries).**

**Every human organisation has its own personality, and therefore a precise path guiding it towards its own fulfilment.**

## Stage 10:

**MAT's Omega Theory applied to the different ages of humankind.**

**The past, the present and the future:**

**1969 - 1989: The age of the competitive jungle.**

**1990 - 2010: The awakening of citizen's solidarity.**

**2011 – 2031: Emerging of a new civilizing humanism.**

**2032 – 2052: Holistic Renaissance for the third millennium.**

## COURSE DETAILS

**Location:** Online, so from any location. All you need is an Internet connection and a webcam.

**Duration:** 5 hours for each Stage during 10 Stages (2 introductory Stages plus 8 optional of more advanced training).

**Price:**

- *Please, contact us, for details on prices.*

**Course language:** Spanish (optional in English).
